# COMPANY OVERVIEW

Star Gardens the Company's owner and founder set up the business as a natural progression from his family's traditional involvement in agriculture. Right from the outset our company's aim was to design, create and maintain gardens. As the business grew, we established the Star Gardens in 1982. The Star Garden has since functioned as the base for our enterprises.

Our core business activities are the supply and maintenance of Indoor and Outdoor plants, landscape, gardening (Balcony, Terrace, Vertical), landscape design, estimation & maintenance, and general irrigation works.

Today the business has grown to become one of the largest landscaping and garden centers in Karnataka & Andra Pradesh.

We also have our own production unit allowing us to produce the plants that we use for our farm. In addition we import additional plants from abroad, as well as other decorative products.

We continuously seek to improve our services by upgrading our products, techniques and abilities in order to take into account technological improvements both in design and irrigation systems.

From being the first garden business to have been created at Punganur (A.P) in 30 acre of land 20 years ago, we have grown into a business with a reputation we can be proud of, built up as a result of the knowledge we have accrued over the years and the top class service and quality of work we provide, as reflected in our extensive and loyal clientele.

## 3. Landscape Design and Estimation

Landscaping is both a science and an art, and requires good observation and design skills. Star Gardens understands the elements of nature and construction and blends them accordingly. We undertake the entire life cycle right from design all the way to a complete product

Our design philosophy is to provide a healthy, comfortable and beautiful environment. Our work is inspired by unique design structures that are not only beautiful but also efficient. Our Engineers work closely with the customer to provide the desired solutions.

## 4. Irrigation System Installation and Maintenance

We install and maintain irrigation systems as per our customer requirements/needs. Our focus is to reduce water waste, pollution runoff and over irrigation.

## 5. Hard Landscaping

This includes the design and installation of Patios, Rockery, Planter boxes, Decorative walls, etc.

# Our Contribution towards a Greener Environment

Our entire operations deal with the provision and maintenance of plants which directly impact the Environment. We will assist our customers in choosing the right indoor/outdoor plants and the corresponding planters
All our products come from suppliers who are committed to environmental safety. There is a greater need for Human beings to take care of the environment especially Plants. We have the responsibilities to ensure that our earth is environmentally healthy for our next generations and also for the entire ecosystem

Plants play a crucial role in this aspect whether they are indoor or outdoor. Some of these benefits are highlighted below:

- Plants capture and eliminate dust particles from the air.
- Plants capture and eliminate toxic substances from the air and also release Oxygen and eliminate carbon Dioxide
- Plants regulate Humidity of their surroundings, this is vital, considering the massive use of Air Conditioning in "Sealed Buildings".

Plants in buildings create environmental awareness to our customers and the general public.

From the global point of view, earth can be considered as a living being, (Gaia theory, Lovelock). The plants are its lungs as they release oxygen and eliminate co2, if this would not occur the animal's life process would exhaust oxygen and life on earth would not be possible

Human beings and plants need each other. Why then should we not take care of plants in the right way?

STAR GARDENS

# Choosing the Right Indoor Plants

All indoors plants (flowering or not) are able to purify indoor air to some degree through their normal photosynthesis processes.
But some are found to be more beneficial than others in removing harmful household toxins (Removing 90% Of Chemicals In The Air in Only Twenty Four Hours!) It is therefore important to be able to choose the right plants.

STAR GARDENS

# Choosing the Right Outdoor Plants

There are many factors to consider when choosing the right outdoor plants for a garden or landscape setting. Beyond simple preferences in height, breadth, growing season, fragrance in blossoms, ease of Care, uniqueness, and variety, there are considerations of soil conditions, temperature, access to light, potential for pests and disease, ability to complement rather than compete with garden neighbors.

STAR GARDENS
